

A heatmap showing pairwise disimilarity between 15 samples. The x and y axes are both labeled '1-15' at the bottom and left. A color bar on the right indicates the disimilarity scale from 0 (light blue) to 5 (dark blue). The diagonal elements are white, representing a disimilarity of 0. The heatmap shows a block-like pattern of varying disimilarity values across the 15 samples.
